

Westlock Controls New and Advanced Product Training Course

The New and Advanced Product Training (NAP) curriculum is designed to provide attendees with a practical understanding of Westlock innovative products that will be introduced to the market in the next few months.

These products, their application and associated technologies will be covered in sufficient detail that participants of the training will be able to successfully promote these products in their respective markets.

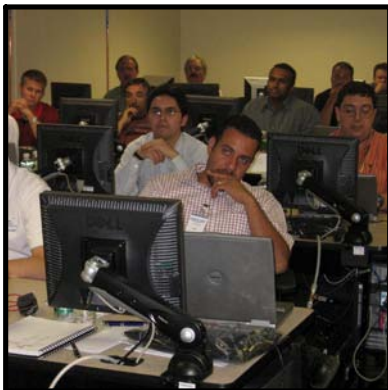

The training materials will be presented in a seminar format with ample time for questions. Each trainee will receive a training binder with all course materials in hard copy and CD-ROM.

A moderate level of technical and industrial control/automation systems knowledge is assumed and attendees should be comfortable discussing basic electrical, logic and network system concepts.

When: Training courses are scheduled for:

- June 25th -28th, 2007
- August 27th – 31st, 2007
- October 22nd – 26th, 2007

Where: Westlock home office in Saddle Brook, NJ

“Get where you’d like to go, faster”.

Westlock has made the delivery of outstanding training and support a high priority. Our Advanced Technology Training Center provides a state of the art facility designed specifically for process industry products and technologies.

We are here to help, because we enjoy what we do. Individuals who have completed our training increased their knowledge and ability to work with our products and associated technologies.

Westlock Controls’ most fundamental policy is to manufacture and provide safe, reliable, quality products and services which we individually would be proud to deliver to the end user.
