

1 **TYPE EXAMINATION CERTIFICATE**

2 Equipment intended for use in Potentially Explosive Atmospheres Directive 2014/34/EU

3 Certificate Number: **Sira 08ATEX4279X** Issue: **1**

4 Equipment: **Valve Position Monitors UK Part Number 3500 (US Part Number 9468)**

5 Applicant: **Westlock Controls Limited** **Westlock Controls Corp.**

6 Address: 22 Chapman Way 280 Midland Avenue
Tunbridge Wells Saddle Brook
Kent TN2 3EF NJ 07662
UK USA

7 This equipment and any acceptable variation thereto is specified in the schedule to this certificate and the documents therein referred to.

8 CSA Group Netherlands B.V. certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design of Category 3 equipment intended for use in potentially explosive atmospheres given in Annex II to the Directive.

The examination and test results are recorded in the confidential reports listed in Section 14.2.

9 Compliance with the Essential Health and Safety Requirements, with the exception of those listed in the schedule to this certificate, has been assured by compliance with the following documents:

EN 60079-0:2006

EN 60079-15:2005

10 If the sign 'X' is placed after the certificate number, it indicates that the equipment is subject to Specific Conditions of Use identified in the schedule to this certificate.

11 This Type Examination Certificate relates only to the design of the specified equipment, and not to specific items of equipment subsequently manufactured. If applicable, further requirements of this Directive apply to the manufacture and supply of this equipment.

12 The marking of the equipment shall include the following:

II 3G
Ex nA IIC T3 Gc
(Ta = -20°C to 70°C)

Project Number 3031

Signed:

Title: Director of Operations

13 DESCRIPTION OF EQUIPMENT

The Valve Position Monitors UK Part Number 3500 (US Part Number 9468) provide three methods of end of travel indication by the means of two, sealed, bifurcated, integral switches and input circuit LEDs that are located within a separate module known as a MagPAC module. External visual indication is available as an option on all models. The MagPAC module is located within an enclosure that has two parts, a cover and housing, made from either aluminium or 316 stainless steel. This enclosure provides a minimum ingress protection of IP54 and can have up to three, conduit entries, M20 x 1.5p, M25 x 1.5p, 1/2" -14 NPT, 3/4" -14 NPT or Pg 13.5, that accommodate appropriately certified cable glands thus enabling connection to an external power source.

UK Part Number System (Model 3500)															
1	2	3	4	5	6	7	8	9	10	11	12	-	13	14	Field Number
XX	X	9	X	XX	X	X	X	X	2	X	XXX	-	X	X	Character

US Part Number System (Model 9468)						
1	2	3	4	5	6	Field Number
9468	X	XX	XX	2M13	00	Character

Note: Material special build code to follow code above for Aluminium or Stainless Steel

Refer to Certificate Annexe.

14.2 Associated Sira Reports and Certificate History

Issue	Date	Report no.	Comment
0	26 November 2008	R52L18531A	The release of the prime certificate.
1	15th October 2019	3031	<ul style="list-style-type: none">Transfer of certificate Sira 08ATEX4279X from Sira Certification Service to CSA Group Netherlands B.V..Type-Examination Certificate in accordance with 94/9/EC updated to Type-Examination Certificate in accordance with Directive 2014/34/EU. (In accordance with Article 41 of Directive 2014/34/EU, Type-Examination Certificates referring to 94/9/EC that were in existence prior to the date of application of 2014/34/EU (20 April 2016) may be referenced as if they were issued in accordance with Directive 2014/34/EU. Variations to such Type-Examination Certificates may continue to bear the original certificate number issued prior to 20 April 2016.)

15 SPECIAL CONDITIONS FOR SAFE USE (denoted by X after the certificate number)

- 15.1 The Valve Monitors shall be connected to a device which prevents supply voltage transients in excess of 40% of the rated voltage occurring at the apparatus power supply terminals.
- 15.2 All used terminal screws should be prevented from loosening during service life with the use of RTY silicon sealant or an appropriate epoxy adhesive.
- 15.3 Parts of the enclosure are non-conducting and may generate an ignition-capable level of electrostatic charges under certain extreme conditions. The user should ensure that the equipment is not installed in a location where it may be subjected to external conditions (such as high-pressure steam) that might cause a build-up of electrostatic charges on non-conducting surfaces. Additionally, cleaning of the equipment should be done only with a damp cloth.

15.4 S e light metals may be used at the accessible surface of the apparatus, in rare cases, ignition sources due to impact and friction sparks could occur. This shall be considered when these transmitters are used in locations that specifically require Group II, Category 1 Equipment.

16 **ESSENTIAL HEALTH AND SAFETY REQUIREMENTS OF ANNEX II** (EHSRs)

The relevant EHSRs that are not addressed by the standards listed in this certificate have been identified and individually assessed reports listed in Section 14.2.
